

Relay 7000/8000

High-volume mail demands high-volume accuracy.

Product Characteristics

The Relay 7000/8000 provides the most advanced features and capabilities within our tabletop inserter line. The system utilizes a next generation user interface that is simple to read with a full color and intuitive LCD display and can memorize up to 24 different job settings, enabling users to effortlessly switch applications and program repeat mailings for simple integration into the workflow process. The main feeder tower holds up to four interchangeable feeders and features a high capacity envelope feeder. The system can be configured with two optional high capacity sheet feeders with two trays each that will hold up to 1,000 sheets each. An optional envelope power stacker can be added to assist with handling the high output.

- Perfect sealing quality
- Low noise
- Easy maintenance structure
- Detachable Cassette
- Patented Angle Feed Paddle
- Manual sealing function
- Work counter
