

SecureFold 4120s (PM6)

Sealing system with two pairs (4) rollers guarantees the highest sealing quality even in high-speed operation

Product Characteristics

SF4120s is a fresh sealer with advanced features. High-speed processing of up to 12,000 sheets per hour is possible, and a 4-step speed control system that can be used depending on the situation is implemented. The sealing system with two pairs (4) rollers guarantees the highest sealing quality even in high-speed operation.

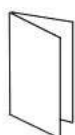

- Multi-sheet feeding prevention through reverse rotation feed roller method (FRR)
- Large capacity paper tray
- Easy paper jam removal and interior cleaning
- Grounding and sealing method control through the built-in folding cassette unit
- 4-step speed control (6, 8, 10, 12 thousand sheets per hour can be controlled)
- Batch counter/auto start function enables work by unit quantity
- Light sensor dual detection
- Paper feed fan blower and manual sealing possible

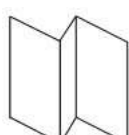

Technical specifications

Paper	A4 / Letter / *1 legal
Speed	12,000 sheets/hour
Feed amount	Up to 800 sheets
Paper Weight	60 - 120gsm
Grounding method	Z, C, V, W
Machine weight	60 kg (without packaging)
Dimensions	415 x 600 x 385 mm (W x L x H)

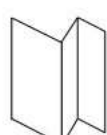

*240mm 1st CST
